The Genealogy of JOSHUA STARK

An Early Settler of Granville, Ohio

Although our Stark ancestors probably came from Britain, the name of Stark, Starks, or Stark may be of German origin. It is derived from the word stark meaning stiff or rugged. So says one authority. Another states, "Stark is an Old Saxon word meaning brave, stout, strong, unyielding."

Among ancient records "Stark" is found in various forms:- Starke, Starck, Starcke, Starckes, Starc, Starkes, Starkman, Starkey, Sterk and probably others. The name as Starkman was found in Cambridgeshire, England as early as 1273 and later in some of its forms in numerous parts of the British Isles; for instance, at Lancaster, England and Killermont, Scotland the name has been established for several centuries. In later English records the name becomes shortened to Starck or Stark.

Families bearing this name with various spellings were also living during early times in Prussia, Hesse, Saxony, Wurtemberg, Nuremberg, Finland, Sweden, Bohemia, Bern and Livonia on the continent where, for the most part, they were of the landed class.

Coming down to the fifteenth century it is supposed by some authorities that the name traveled from Germany to Scotland by way of a German soldier.

It seems that during the reign of Henry VII of England, Margaret of the House of York who was Duchess of Burgundy and widow of Charles the Bold, sent, in 1496, some German troops to England to support the claim of Perkin Warbeck, son of a Flemish Jew, to the crown of England.

Warbeck was, of course, a pretender saying he was Edward, son of Edward IV and therefore rightful heir to the throne. But really, this Edward had been

murdered in the Tower of London after a period of imprisonment. Now he "comes to life" in the form of this pretender.

The English defeated the German army and those soldiers who escaped fled to Scotland where King James protected them.

Descendants of one of these German soldiers lived at Killermont, Scotland and from there branches of the family migrated to Ireland in the seventeenth century. It is generally believed that the early American Starks were descended from this Scotch-Irish line.

All of this is conjecture but it is interesting anyhow. Aaron Stark was the first of the name to reach America and we really do not know from whence he came.

Even in America there is still a little mystery about this Aaron Stark. It is supposed that he came to Massachusetts Bay Colony as early as 1629 and from there went to Connecticut among the first settlers of some colony. (more of this later.) It is also supposed that he was born in 1608.

AARON STARK - FIRST GENERATION

The first known record of this Aaron Stark is that, in response to the call for troops, he enlisted under Captain John Mason of Widdsor, Connecticut in the Pequot War of 1637. This company was composed of first settlers of what is now Hartford, Windsor and Weathersfield.

In 1675, again under the same commander, he fought in King Philip's War and for each service was granted land.

One authority states that his first settlement was in Stonington but another reports that in 1639 we find him at Hartford; in 1655, in New London; and not until 1669 in Stonington where he was made a freeman that year. Here he lived on his farm near the head of the Mystic River.

We might know more about him had not Benedict Arnold pillaged and burned the city of New London Sept. 6, 1781 thus destroying all records.

The name of his wife is not known but the date of their marriage is estimated as 1653-4. The children of Aaron Stark and his wife were, according to Charles R. Stark in his book, The Aaron Stark Family page 1:-

1. AARON
2. John
3. Child (not named)
4. William
5. Sarah married Capt. Samuel Fish
6. Elizabeth married (1) Micah Lambert

Biographical data - Joshua Stark studied medicine with Dr. John Scott of Bozrah and became a physician but for some reason did not practice his profession; for long, anyhow. He also attended Brown University.

Joshua Stark served in the War of 1812 as an officer in a company in defense of New London, Conn. in the attack that the British made on this place.

In 1817 Joshua Stark started by himself with a horse and wagon to find a new home in the Western Reserve but did not know where he would locate. On the way, however, he fell in with a George Case who proposed to Mr. Stark that they go to Licking County, Ohio and it was so agreed. The two finally arrived at Granville, Ohio.

Case was a brickmaker by trade and since there was a demand for this type of building material Case and Stark formed a partnership and proceeded to make the needed brick. They found a ready sale for their product and continued in the business for three years.

Then Joshua Stark purchased some land about three miles west of the present village of Granville. Here he was a successful farmer, an intelligent, active, and worthy citizen, contributing liberally both in time and money to advance the literaty and religious interests of the town.

World War II - Dr. William Denny reported for service in the United States Army Aug. 28, 1942 at Camp Barkley at Abilene, Texas with the rank of Captain in the Medical Corps.

After six weeks of basic training he landed in England Oct. 28, 1942 and was stationed at Winchester, England for 22 months, later moving to Chartres, France for 12 months and finally to LeNous, France for 6 weeks.

He was raised to the rank of Major while in England.

Dr. Denny returned to the United States Sept. 25, 1945 having served 37 months and was never home in all that interval.

During the entire time he served as Chief of the Surgical Service with the same outfit, the 38th Station Hospital. The members of this group did not receive any special recognition but "meritorious service" was put on their discharge papers.

In the remaing few days before discharge the Army awarded Dr. Denny a Lieutenant Colonel status.

As a surgeon, Dr. Denny had an experience about which he said little at the time, but, in spite of his reticence, the record of his bravery was published in The Stars and Stripes at the time and in True Magazine later. The story is as follows:-

While in Winchester, England there was admitted to the hospital a merchant marine with an unexploded 20 mm anti-aircraft shell embedded in his armpit. It fell to Dr. Denny's lot to remove that shell which technically, was no problem as long as it did not explode in the process!! As Dr. Denny puts it, "Well, the Lord was kind and it did not, and that is about the only reason I am here to tell it. I thought at the time the shell was a dud and it probably was. However I was informed before surgery that they were a tricky sort and was given specific instructions as to the possibilities. Wh had no difficulty and I requested no publicity. However, it got around."

In 1959 when Dr. Denny and his wife were in England they drove to Winchester; visited the hospital where he had been stationed and once again Dr. Denny found himself in the room where he had removed that shell!!
